 Feedback Submitted

 **Open Zoom**

We'll start with a general overview from one of the authors of the famous CDL whitepaper; Caltech will share their work on their open source CDL implementation, which aims to balance local needs, anticipated integrations, and the ability to share the code easily and efficiently; and Project ReShare will offer ideas about how everything could be brought together into everyday library management, resource access, and ILL operations.

Moderators

Allen Jones
New School

Speakers

Michael Hucka
Research Software Developer, California Institute of Technology Library

My work is in scientific computing, focusing on the development of software systems, interoperability, and preservation of data. Ph.D. in computer science and electrical engineering. ORCID: 0000-0001-9105-5960.

Stephen Davison
Head of Digital Library Development, Caltech Library

I manage the team responsible for library systems, information technology and software development at the Caltech Library. Previously I worked on digital collections and projects at the UCLA Digital Library, primarily in music and the humanities.

Sebastian Hammer
ReShare/FOLIO, Index Data

Kyle Courtney
Harvard University
